Elevating Yachting Experience with Innovative SUBLIO Technology

Throughout history, the therapeutic benefits of water have been acknowledged for their profound impact on the body and mind. Driven by a passion for all things aquatic, Frédéric Esnault, a self-professed «curious and passionate autodidact,» conceived and introduced an extraordinary innovation that facilitates deep skin regeneration. Drawing inspiration from the transformative effects of water on his own skin during a dip in the Restonica torrent in Haute-Corse, Frederic Esnault developed an ingenious system named SUBLIO that decuplicates water's natural virtues from any water type.
